
Negative initial state reveals finite escape
State $x_1(t)$
Time, t
Published even-power dynamics: $dx/dt=-x^2$
Corrected odd-power dynamics: $dx/dt=-x^3$

The claimed Lyapunov decrease fails for $x_1<0$
$\times 10^5$
Orbital derivative
Time, t
dV/dt for even-power model
dV/dt for corrected model
